cosmetic treatment offering*

Skincare formulated with molecular science. „Molecular“ means to work on a cellular level. If each active ingredient represents a molecule, each one can have a different size and different pathway to perform very specific and focused tasks throughout the skin. For a formula to be truly effective, its molecular structure needs to have a 360° approach to heal, repair and regenerate the skin across a complex matrix.

BRIGHTENING

Smother, brighter, and more radiant skin

The facial treatment against pigmentation spots reduces the occurrence of hyperpigmentation and gently evens out the skin tone. It fights oxidative stress that causes premature aging and dark spots. Hydrating ingredients also provide essential hydration and rejuvenating anti-aging effects.

60 minutes, 5 400 CZK / 225 EUR

OPTIONAL TECHNOLOGY ADD ON:

Microneedling will help generate collagen and reduce the appearance of dark spots, pores, fine lines and wrinkles.

SUPER ANTI-AGING

Facial muscle sculpting for firmer and smoother skin

The Super Anti-Aging treatment replenishes hydration levels, supports the skin's natural protective barrier, and reduces the appearance of fine lines and wrinkles.

The treatment also includes the application of microcurrent, which stimulates facial muscles and promotes collagen and elastin production, enhancing skin elasticity. This rejuvenating ritual visibly firms the skin around the jawline and neck, revitalizing tired skin.
